

NRG[®]

Glucose powder

DESCRIPTION

NRG[®] is a preparation of oral glucose. It is a crystalline, water-soluble monosaccharide, which is absorbed in the blood stream through intestinal wall and is used as a source of energy.

INDICATIONS

NRG[®] is indicated for general weakness. It can be taken after excessive work and exertion as it replenishes depleted energy.

DOSAGE AND ADMINISTRATION

There is no specific dosage regimen. The dosage depends on the requirement of an individual or as recommended by the physician.

CONTRAINDICATIONS

Persons having glucose intolerance and hypersensitivity to it.

PRECAUTIONS

NRG[®] is for oral consumption only. It is not for injection.

SIDE-EFFECTS

No side effect is reported.

DRUG INTERACTIONS

There are no significant interactions reported with this medicine.

PHARMACEUTICAL PRECAUTIONS

Store in a dry place and away from light.
Keep out of reach of children.
