

## DRUG INTERACTIONS

Concomitant intake of a tetracycline and zinc may decrease the absorption of both the tetracycline and zinc. Similarly concomitant administration of zinc and quinolone may also decrease the absorption of both. Concomitant intake of penicillamine and zinc may depress absorption of zinc. As little as 5 mg pyridoxine daily can decrease the efficiency of levodopa in the treatment of parkinsonism.

## USE IN PREGNANCY AND LACTATION

**Xinc B<sup>®</sup>** can be used in pregnancy and lactation.

## OVERDOSAGE

Symptoms of overdose may include severe nausea, vomiting, dizziness, convulsions and coma after apparent recovery. In case of overdose one should seek emergency medical attention.

## PHARMACEUTICAL PRECAUTION
